Introduction:

1. The workshop aims to share:

- E-government development strategies of Taiwan.
- How to make public services more efficient through e-government.
- The latest developments in e-government.

2. To assist partner countries in gaining comprehensive knowledge of e-government, the workshop focuses mainly on strategy planning, service quality improvement, and innovations in e-government.

Agenda:

- Indoor lectures: Cover various topics of e-government development, such as the policy and strategy making for e-government development in Taiwan, the utilization and promotion of digital services, information security, big data utilization, smart city construction, and so on.
- Field trips: Visits to National Development Council, IT services corporations, and Smart City successful case.
- Group presentations: Participants present their accomplishments after having a common understanding on e-government development through group discussion.
