Introduction:

1. The workshop aims to:

- Apply quality management approaches to clinical practice to improve medical quality.
- Avoid controversy arising from medical errors by healthcare workers to reduce incidents of malpractice.

- 2. To assist partner countries in gaining comprehensive knowledge of medical quality management, the workshop focuses mainly on strategic and practical methods.**

Agenda:

- Indoor lectures: Various topics on the management of medical quality such as Healthcare Quality Policy, Drug Safety Improvement, Infection Control, Patient Safety Enhancement, Development of Quality Indicator System for Hospitals and Performance Evaluation of Facility Management in Hospitals.
- Field trips: Visits to Hospital Quality Management Centers and Resource Center of Medication Education.
- Group presentations: Participants present their accomplishments after having a common understanding on management of medical quality through group discussion.
