Introduction:

1. The workshop aims to share:

- How to improve efficiency of water management.
- How to promote resilience and sustainability of water management.
- Taiwan's latest water management facilities and technologies.

- 2. To assist partner countries in gaining comprehensive knowledge of the applications and management of smart water, the workshop focuses mainly on smart water management and ICT applications for smart water management.**

Agenda:

- Indoor lectures: Including how to implement effective management of water resources, increase water resources revenue, actual practices in response to climate change, water recycling, long-term resilience establishment and planning, and innovative technology applications for water resources management.
- Field trips: Visits to organizations involved in water resources management.
- Group presentations: Participants will present their accomplishments after having a common understanding on water management through group discussion.
