**Introduction:**

**1. The workshop aims to:**

- Explain the policies on nursing care in Taiwan and share practical experience in related fields.
- Improve quality of nursing care to ensure patient safety and enhance management of medical quality to provide comprehensive medical care.

2. **To assist partner countries in gaining comprehensive knowledge of medical quality management in nursing care, the workshop focuses mainly on strategic and practical methods.**

**Agenda:**

- Indoor lectures: Various topics on medical quality management in nursing care such as safety management in nursing care, quality management in nursing, patient safety enhancement, and risk management in nursing.
- Field trips: Visits to hospital quality management centers and centers for evidence-based medicine.
- Group presentations: Participants present their accomplishments after having a common understanding on medical quality management in nursing care through group discussion.
