

15 Workshop on Technology Applications for Resilience in Agriculture (Exclusive for ASEAN and South Asian)

Projected training dates: October 23 to November 5, 2019

Application Period: July 26 - August 25, 2019

Number of attendees: 20

Target attendees: Government officials, professionals, researchers and NGOs

Eligibility:

- Age: Under 50 years old
- Education: College degree or above
- Language: Good command of English
- Experience: Agricultural production, biotechnology, ICT, plant breeding, environmental biology with at least two years' experience

How to apply: Through the Taiwan (R.O.C) embassies, representative offices or technical missions

Introduction:

1. The workshop aims to share:

- Adaptation measures to climate change: soil and plant nutrition management
- Agricultural biotechnology: breeding technologies, microbial agents
- Technical applications: remote sensing and GIS
- Environmental mitigation solutions: environmentally friendly farming
- Agricultural biodiversity: sustainable uses, biodiversity conservation

2. This workshop includes indoor lectures, participants report, 2019 Asia Agri-Tech Expo & Forum and field visits.

Agenda:

- Indoor lectures: Develop resilient crop species, precision agriculture, agricultural biotechnology, species conservation techniques, biodiversity conservation and management, and crop stress tolerance.
- Participants report and interaction platform
- Field trips: Visits to successful government and private companies or business.
