Introduction:

1. The workshop aims to share:
   - How to develop circular economy in order to ensure sustainable resource management and decrease environmental impact.
   - How to enhance resource recycling technologies in order to produce substantial benefits for the economy, the society, environmental protection and green energy.
2. To assist partner countries in gaining comprehensive knowledge of circular economy, the workshop focuses mainly on green business and the technology and innovation of circular economy.

Agenda:

- Indoor lectures: Various topics on the circular economy such as green supply chain, green production, green marketing, green consumption, green technical innovation, new technology in waste recycling, green energy technology and sustainable management, innovative business models and product servitization.
- Field trips: Visits to organizations involved in developing circular economy.
- Group presentations: Participants will present their accomplishments after having a common understanding on the circular economy through group discussion.
