Training on Plumbing, Electrical Installation, and Home Appliance Repair

Date : Oct 7 - Nov 10, 2026
Application Deadline : Aug 10, 2026
Languages: English, Spanish

Overview

The rapid advancement of technology and smart manufacturing has created a surging demand for professionals skilled in plumbing, electrical installation, and smart appliance repair. Traditional maintenance skills are no longer sufficient for modern smart home appliances. This comprehensive course combines the theory and practice of Plumbing, Electrical Installation, and Smart Home Appliance Repair to meet industry needs, focusing on strengthening participants' expertise and enabling them to cultivate local talent upon returning home.

Course Arrangement

1. Plumbing and Electrical Expertise: Master the fundamental principles and practical skills of indoor wiring, motor control, and water supply piping. Strengthen proficiency in installation and maintenance through hands-on practice.
2. Smart Appliance Diagnostics: Cultivate advanced repair and diagnostic skills for diverse smart home appliances. Achieve proficiency in troubleshooting, installation, and cleaning using specialized maintenance tools.

Eligibility

- Target Audience: Vocational trainers from government vocational training institutions, lecturers from universities of science and technology, and trainers from organizations related to commercial design or mechanical engineering.
- Requirement: Must be 20 years of age or older.
