APPLICATION DEADLINE : AUG. 5, 2024

LANGUAGE : ENGLISH

INVITATION REQUIRED: THROUGH THE R.O.C(TAIWAN) EMBASSIES, REPRESENTATIVE OFFICES.

TAIWAN 

INTRODUCTION

Recently, 3D printing technology has been garnering significant global attention due to its ability to meet demands for high customization and small-scale production. This course equips participants with a thorough understanding of an industry-standard CAD software, Solidworks, as well as other practical skills.

COURSE ARRANGEMENT

- **Academic Component:** Introduce the fundamentals of 3D printer technology and Solidworks.
- **Technical Component:** Hands-on training in Solidworks drafting and 3D printing under the guidance of multiple instructors.

ELIGIBILITY

- **Background:** participants employed in government training positions, involved in business design or mechanical engineering training, or interested in computer-aided drafting and 3D printing prototyping
- **Expertise:** participants should have at least a high school diploma or vocational training.
