Electric Vehicle Operation and Maintenance Training Course (Language: English)

Date: June 5 to July 10, 2024

Application Deadline: April 26, 2024

*Invitation Required: Through the R.O.C(Taiwan) embassies, representative offices.

Overview

This training course equips participants with a deep understanding of the types and features of electric vehicles, as well as the fundamental knowledge and practical skills necessary for maintaining them. It pairs operational training with hands-on repair exercises, preparing participants to become skilled technicians and leading seed instructors in vocational training centers or technology-focused universities. Participants will be able to leverage their knowledge in real-world applications within the electric vehicle industry.

Course Arrangement

This 181-hour training revolves around the fundamentals and applications of the three-electric system, complemented by hands-on trainings and site visits. It encompasses:

- Power Control Systems
- Electric Motorcycle Maintenance (including practical sessions)
- Maintenance of EV and HEV (including practical sessions)

Eligibility

- Instructors from government vocational training centers or faculty of electrical engineering departments in technical universities.
